

Welcome to Kellogg High School. Please read the following if you desire to participate in our interscholastic activities. You are eligible only if you:

- Attended school last semester (trimester).
- Received passing grades and earned credits in at least five (5) full time credit subjects or the equivalent the previous semester.
- Have been in high school no more than four consecutive years after your first entry in the ninth grade.
- Have not reached your twentieth (20) birthday.
- Have completed a physical examination or equivalency during the past 12 months.
- Have transferred to this school for reasons other than to participate in athletics.
- Are not a professional athlete in the sport you wish to participate.

NOTE: If you have changed schools without a corresponding change in residence, you will be eligible for competition below the varsity level, provided you meet all the above requirements and have been released to participate in activities at the new school by the principal of the previous school.

TO BE ELIGIBLE FOR VARSITY COMPETITION YOU MUST FIRST:

- Have met all the above requirements
- Have physically moved with your parents to a residence located within the new high school attendance zone.

To be eligible to compete against another school team or opponent, you must first:

- Be academically eligible in this school.
- Complete the required number of practice days.
- Have attended school the previous semester.
- Be declared eligible by the principal.
- Be enrolled in regular attendance within the first 10 school days in the current semester.

Our school's athletic code and eligibility policies are attached. Please share this information with your parents.

Kellogg School District Activities Code

August 2016

INTRODUCTION

In order that students, parents/guardians, coaches, and advisors may understand the school district's co-curricular philosophy and procedures, we submit the following statement of Code to replace the current athletic code.

I. PHILOSOPHY, OBJECTIVES, AND DEFINITIONS

School activities play an integral part of the total educational process of students enrolled in the Kellogg School District. Because activities provide an educational opportunity, coaches, advisors, and participants will strive to meet the following objectives:

- Promote and contribute to the goals of the total educational program.
- Promote good citizenship and respect for rules and authority.
- Promote involvement and community interest in activities.
- Promote good sportsmanship.
- Learn the value of competitive participation.
- Develop individual and team skills.
- Practice good health habits.
- Practice physical, intellectual, and artistic development.
- Represent the school and community in a positive manner.

If students in grades 7-12 choose to participate in activities, they do so voluntarily, and, therefore, there are expectations beyond those required of students who do not wish to participate in activities. These include maintaining academic eligibility, abiding by rules set forth by the coach/advisor, being subject to consequences set forth in the behavior management plan and the activities Code, and setting high standards for behavior. Moreover, commitment to activities requires that participants refrain from the use or possession of controlled substances. **Participation in activities is considered to be a privilege, not a right.**

Those students who violate the "Student Activities Code" shall be subject to discipline that may include permanent removal from participation in school district activities. Additionally, the Kellogg School District Board of Trustees, by adopting this Code, hopes to increase academic achievement and decrease peer pressure to use controlled substances on students participating in activities.

- **Duration of Activities Code**: Once the Athlete Code is signed by an athlete, they are bound by conditions set forth in the Athletic Code for the rest of their Middle School and High School career. It will still be required to sign the Athletic Code every year as a reminder of the conditions and consequences set forth in the Code.
- **Curricular Activities**: These are instructional activities that are integral to the classroom as a part of the curriculum and are a natural extension of classroom activities that result in a course grade or credit. Any activity for which a grade is issued will be considered a curricular activity. Examples of graded activities that may occur outside of the normal classroom situation include, but are not limited to: band or choir concerts, competitions, music festivals, and selected drama productions.
- **Co-Curricular Activities**: These are activities that are in addition to classroom instruction and have no bearing on a course grade or credit. These activities include, but are not limited to: school clubs, student government, academic competitions, all athletics, pep band, cheerleading, and other organized activities where credit is not involved.
- **Controlled Substances**: These include, but are not limited to: alcohol, tobacco, opiates, opium derivatives, stimulants, steroids, hallucinogenic substances, cocaine, cannabis, synthetic equivalents of the substances that have a depressant effect on the central nervous system, and drug paraphernalia. Excepted from this definition are any medications specifically prescribed for a student's use by his/her own doctor.
- **Season**: It is the intent of this code to apply to all student participants in all co-curricular activities. In order to establish a uniform start date for the Activities Code, the Code goes into effect on the first official day of practice for that season. A student who signs the code after the first day of the seasons practice will be subject to any sanctions and/or consequences if a violation is committed between the first day of the seasons practice and the date the code is signed. **Completion of the entire activities season is required in order for the student to be eligible for team awards, individual awards, letters or pins.** No letter awards shall be given to any student suspended for the remainder of the season for Activity Code Violations 4, 5 and 6. Exception: Injury which limits participation.
- **Self-Reporting**: Full disclosure of all facts related to any activity in violation of this code upon the initial inquiry of a school administrator. This includes, but is not limited to, the place and date of the activity, other participants, and other pertinent facts relating to the investigation.
- **Suspension**: The inability to participate with the co-curricular team during that time. This includes any functions that may be taking place during the time of suspension. This includes, but is not limited to, homecoming activities, senior night activities, districts, and/or state competition. During the time of the suspension, the participant cannot be associated with the rest of the team during competition or the event. This includes, but is

not limited to, sitting with team during the event, wearing Kellogg High School uniforms, or riding the bus to or from the event. During the time of suspension, the suspended athlete must attend all practices. In the event that the suspension is a percentage of the season, the percentage will be based on the full season. If the suspension more than concludes the remainder of the season, the suspension will carry over to the following activity that individual will participate in (i.e. suspended during basketball season for 50% of the season. This would mean that they would be suspended for 10 games, however only 5 games remain. This would equivocate to 25%. The remaining 25% suspension would come from the next activity based on how many games they participate in). Athletes must complete the season for the suspension to count as part of the consequences for their actions.

II. ATTENDANCE

A student must be in school during the entire day in order to attend or participate in a practice or co-curricular activity that day. An exception would be if a student had a pre-arranged absence that prevented attendance. A pre-arranged absence needs to be arranged at least the day prior to the absence. If a student skips a class or is truant from two or more classes during the day, he/she will forfeit the privilege of competing in the next scheduled activity. Hardship cases will be handled on an individual basis.

III. ACADEMIC EXPECTATIONS

- A. It is our hope that students participating in co-curricular activities will be enrolled as full-time students and will be passing **all** classes. According to I.H.S.A.A. rules if, at the end of a semester, a student is failing more than two (2) classes he/she will be academically ineligible for the next semester. Home-schooled students may petition the building principal to waive academic expectations.
- B. According to I.H.S.A.A. rules a student athlete with less than a 2.0 cumulative grade point average must be on an academic improvement plan to participate in athletics. Such plan shall be developed by the coach and player and be on file with the Athletic Director.
- C. Athletes must be full time students and maintain a 2.0 GPA to participate in extracurricular activities. Grade checks will be every progress period after the start of each semester. If an athlete is below a 2.0 GPA at the time of the grade check they will be given 2 weeks to bring their GPA up to a 2.0 or will lose their Academic Eligibility. During the 2 weeks the athlete must attend after school tutoring. The athlete can regain their eligibility by showing official school documentation (Skyward) to the administration that their GPA is 2.0 or higher. It is the student's responsibility to obtain and present the documentation to the administration. If an athlete regains Academic Eligibility and then fails another progress period grade check during that season they will be ineligible for the remainder of that season.

IV. Hazing

“Hazing” a form of harassment, means any intentional, knowing or reckless act directed against a student for the purpose of being initiated into, affiliating with, holding office in, or maintaining membership in an organization, club or athletic team whose members are, or include, other students. Students engaging in hazing that endangers the mental or physical health or safety of another may also be subject to in-school suspension, out-of school suspension and/or expulsion.

V. Tobacco

The Kellogg School District recognizes that the use of tobacco, including smokeless tobacco, is a potential health hazard and is addictive in nature. The use or possession of tobacco by a student involved in co-curricular activities will not be tolerated. Participants who violate this regulation may be referred to law enforcement and will be subject to the following action:

First Violation – A participant in grades 7-12 who commits a tobacco violation will be counseled on the hazards of tobacco to his/her health and will be restricted from participation in the activity for no less than 33% of the regular season, performance, competition, or event. The student will be required to research and write a one-page typed essay on the effects of tobacco. This paper must be in proper essay format and approved by the Activities Director and/or coach. When the full penalty cannot be imposed, the remaining portion of the suspension will be carried over and served during the next activity participated in by the student.

Second Violation – Suspension for the remainder of that extra-curricular activity season and 50% of the next season the athlete participates in.

Third Violation – Suspension from participation in all co-curricular programs within the Kellogg School District for the remainder of that activity and the next three seasons.

Fourth Violation – Suspension from participation in all co-curricular programs within the Kellogg School District for the remainder of his/her school career.

VI. COMMISSION OF AN ALCOHOL VIOLATION

- A. A participant shall not use, consume, possess, transmit, or sell any alcohol or other controlled substances.
- B. A participant shall not be present at a party or other gathering where one or more individuals are illegally using alcohol or other controlled substances.

- C. A participant, within the constraints of safety, shall not knowingly drive or remain in a vehicle where controlled substances are possessed or being used by one or more minors.

VII. PENALTIES

A. First Violation:

1. A participant in grades 7-12 who commits an alcohol violation shall be suspended for 50% of the regular season from participating in any game, contest, competition, or event. (i.e. Varsity Basketball season consists of 20 regular season games. A 50% suspension would therefore consist of 10 games.)
2. In the event that a student self-reports the violation, the suspension will be reduced to 33% of the season. (i.e. Varsity Basketball season consists of 20 games. 33% therefore would be equal to 6.67 games. The length of the suspension would equal 7 games.)
3. If a citation related to an alcohol violation is issued to a student, that student must disclose the citation to a school administrator on the next school day or no reduction for self-reporting will be considered.
4. The student will be required to research and write a one-page typed essay on the effects of the controlled substance. This paper must be in proper essay format and approved by the Activities Director before verbally presenting this to the student's current team and/or next sporting team.
5. When the full penalty cannot be imposed, the remaining portion of the suspension will be carried over and served during the next activity participated in by the student.
6. A participant must conclude the season with any activity that is used to finish a penalty from a previous season. Failure to complete the activity will result in the penalty being carried over to the next activity participated in by the student.
7. When a student commits a violation of the Athletic Code during the school year during a time when he/she is not involved in any activity covered by this Code the student shall be suspended for 33% of the next season they participate in (i.e. Varsity Basketball season consists of 20 games. 33% therefore would be equal to 6.67 games. The length of the suspension would equal 7 games.). A second offense when not involved in an activity will result in being suspended for 50% of the next season the student participates in. The suspension may be reduced for a first offense to 25% of the season for self-reporting.
8. When a student commits a violation of the Athletic Code during the non-school year, during a period of time when he/she is not involved in any activity covered by this Code, the violation will be recorded but no punishment rendered. However, when the student subsequently becomes involved in an activity, the student will begin the activity with one violation on his/her record. The first violation that occurs while involved in an activity will then automatically be treated as a second violation. If a

student commits two or more violations while not involved in an activity, or as a combination of out-of-season and in-season violations, the student will have two violations recorded on the record as he/she enters a new activity. A subsequent in-season violation will result in the offense being treated as a third violation.

B. Second Violation

1. A participant in grades 7-12 who commits a second alcohol and/or other controlled substance violation shall be suspended from participating in any activity covered by the Athletic Code for the remainder of that season and 50% of the next season they participate in.
2. For controlled substance violations, the student must also attend a controlled substance education program approved by the school district before he/she is eligible for reinstatement. The cost of the program will be the responsibility of the participant and/or his/her parents. Failure to complete the program will result in continued suspension from activities.

C. Third Violation

1. A participant in grades 7-12 who commits a third alcohol and/or other controlled substance violation shall be suspended from all participation in co-curricular activities for the rest of that season and the next three seasons.
2. In addition, for a third alcohol and/or other controlled substance violation, the participant must undergo a drug and alcohol assessment program approved by the school district, comply with the recommendations of the professional conducting the test assessment, and provide documentation of the assessment and compliance with the recommendations in order to be eligible for reinstatement at the end of the calendar year. The expenses of the assessment and any actions necessary to comply with the recommendations must be borne by the student and his/her parents. In the event of a hardship, the Kellogg School District may help offset expenses.

D. Fourth Violation

If a participant in grades 7-12 commits a fourth alcohol and/or other controlled substance violation during his/her school career, or while under suspension from a second violation, he/she will be suspended from participation in activities for the remainder of his/her high school career, unless reinstated by the Board of Trustees.

E. Reinstatement – After Fourth Offense

A student who has successfully completed an approved treatment program and provides a written report from the treatment provider may apply to the Board of Trustees for reinstatement after a minimum ineligibility period of one calendar year. As a condition prior

to reinstatement, the Board of Trustees may require an individualized plan, including but not limited to sanctions, community service, or other requirements.

VIII. DRUG AND CONTROLLED SUBSTANCE VIOLATIONS

Students participating in extracurricular activities, including interscholastic competitions, represent the community, the school and their peers. When participating students use illegal substances and/or alcohol, such use impinges upon the individual student's performance and his or her ability to be a cohesive member of the student group. As a result, the well-being of the individual, the activity group and the general school community is diminished by a student's use of illegal substances and/or alcohol.

As participation in extracurricular activities is a privilege, not a right, participating students voluntarily subject themselves to a degree of regulation higher than that imposed on students generally. Students who voluntarily participate in extracurricular activities have reason to expect intrusions upon normal rights and privileges including privacy.

This District Policy 578 is adopted to provide the district personnel with tools to provide a safe environment for all students who participate in the identified extracurricular activities.

This district will test students who participate in extracurricular activities for illegal substance and/or alcohol use. District Policy 578 applies to all students participating in any district-sponsored interscholastic activity that is regulated by the Idaho High School Activities Association (IHSAA).

A. Verification of Legal Drug Use

Participants who are drug tested under District Policy 578 will be given a reasonable opportunity to submit verification of prescription drug use. At the time of testing, each student will be given written notice that he or she has seventy-two (72) hours to submit verification of any prescription drug use by providing a copy of the prescription to the building principal or designee in a sealed envelope. The information regarding the use of prescription drugs is confidential and will not be shared with any school official. If the student fails to provide timely verification of legal drug use, and tests positive, he or she will be subject to retesting.

B. Frequency of Testing

The following provisions apply to frequency of testing:

1. All participants in extracurricular activities may be tested at the beginning of each school year or relevant sports season.
2. Random testing may occur each week during a school year or relevant sports season, and ten (10) percent of all student participants, regardless of the activity, may be tested each week.

C. Confirming a Test Result

Whenever a test result indicates the presence of an illegal substance, the students will be retested. The school will not be obligated to give the student advance notice of the retesting. The following procedure will be used to confirm a test result:

1. A second sample will be gathered from the student as soon as possible to confirm the test result. If the student refuses to provide a second sample, or unduly delays in providing such sample, the results of the first sample will be accepted as accurate.
2. If the second test is negative, the student will be notified and no further action will be taken. If the second test is positive, the procedures identified in the section "Confirmed Positive Test Results" will be followed.

D. Confirmed Positive Test Results

A test is considered "confirmed positive" when a retest also yields a positive result. See the preceding section titled "Confirming a Test Result".

1. First Confirmed Positive Test:

The first time a student's test results are confirmed positive, the student's parent/guardian will be notified and the principal or designee will convene a meeting with the student and parent/guardian. At that meeting, the student will be required to choose one of the following options.

- a. Suspension from the team and/or other extracurricular activities for a period of six (6) weeks and participation in a district approved substance and alcohol abuse assistance program, including random analysis.
- b. Suspension from participation in any extracurricular activities for the remainder of the current season and the next athletic season.

If the student fails to select an option within seventy-two (72) hours after notification of the test results, he or she will be deemed to have selected option number two (2).

2. Second Confirmed Positive Test:

A participating student's second confirmed positive test within two (2) calendar years will result in automatic suspension from all extracurricular activities for a period of twelve (12) months from the date of the second confirmed positive test. The suspension applies to student participants who have tested positive in this school district's drug testing program and to student participants enrolled in this district who have previously tested positive in another district with a similar drug testing program.

3. Third Confirmed Positive Test:

A student participant's third confirmed positive test within two (2) calendar years will result in automatic suspension from all extracurricular activities for the remainder of the current school year and the next two (2) school years. The suspension applies to student participants who have tested positive in this school district's drug testing

program and to student participants enrolled in this district who have previously tested positive in another district with a similar drug testing program.

E. Post-Suspension Eligibility

Students who test positive and are suspended from extracurricular activities must be retested and test negative prior to being allowed to participate in any extracurricular activities. If the suspension terminates during a sports season, or after an enrollment period for any other extracurricular activity has expired, the student is not eligible to participate until the next enrollment or try-out period occurs.

IX. DETERMINATION OF VIOLATIONS - STUDENT'S RIGHT TO DUE PROCESS

- A. When there is reasonable cause to believe that a student has violated this Code by committing any of the above acts, the principal and/or activities director will conduct an investigation.
- B. As a part of the investigation process, the student will receive notice of the allegation that he/she violated the Code, and will be given an informal hearing with the investigator. Parents/guardians and the head coach/advisor will be informed of this hearing.
- C. At the hearing, the reasons for possible suspension from activities will be stated, and the student will be given an opportunity to provide evidence.
- D. The investigator may determine if a violation of the Code has occurred from examination of the facts, information, and/or evidence from any source the investigator finds reasonably credible.

X. APPEALS

- A. A student may appeal the determination that he/she has violated this Code and/or the penalty imposed by filing a written request with the principal within ten (10) days of the date the determination is made. The request for an appeal must clearly state the reasons why the review is being requested. The review will be an informal meeting of the student, parents/guardians if desired, and a panel consisting of the principal, activities director, and head coach/advisor. The panel will issue a written decision within five (5) school days of the date of the review.
- B. If the student's appeal to the panel is not successful, the student has the right to appeal to the Kellogg School District Board of Trustees by filing a written request with the Superintendent's office within ten (10) days of the date the determination is made. The request for an appeal must clearly state the reasons why the review is

being requested. The Board of Trustees will issue a written decision within five (5) school days of the date of the review. The decision of the Board of Trustees is final.

- C. Students shall abide by all other terms of their suspension until a final determination is made regarding their appeal.

XI. TRANSPORTATION

Participants are required to ride the bus to and from school activities. Following an activity, participants may be released to **parent/guardian only** with written authorization. If a responsible adult other than a parent/guardian is going to be checking a participant out from an event, a notarized note stating that needs to be received by the Kellogg High School Administration before that team leaves for their destination. A separate notarized note is required for each event.

XII. CITIZENSHIP

All students associated with activities such as athletics, drama, music, band, speech, dance team, and managers are reminded that they represent Kellogg High School. All students involved in such activities must recognize that their conduct is either a positive or negative influence to their school and community, whether in school or outside school time. It is our philosophy that conduct detrimental to the school or community and if there is a lack of citizenship either in school or out, a student may forfeit the opportunity to represent Kellogg High School. Such disciplinary actions will be judged on an individual basis by the administration and coaches.

Student athletes who receive in-school suspension will be expected to dress down for all practices, yet will not be eligible to participate in a contest during the day serving in-school suspension. Students serving in-school suspension on a Friday and the following Monday are also not eligible to participate in any contests on the included Saturday or Sunday.

Other Rules to Live By

From the Parents Association for Youth Sports code of ethics:

- I will support coaches and officials working with my child.
- I will ask my child to treat other players, coaches, fans and officials with respect.
- I will remember that the game is for youth – not adults.

From “How to Establish Rapport with Your Child”

- Try your best to be completely honest about your child’s athletic capability, their competitive attitude, sportsmanship and actual skill level.
- Be helpful but don’t coach them on the way to the rink, pool or track.
- Try not to relive your athletic life through your children.
- Don’t compete with the coach.
- Always remember that children tend to exaggerate, both when praised and when criticized.

From “Rules for Raising Delinquent Children”

- Give the child everything he wants.
- Do everything for them.
- Satisfy their every craving.
- Take his part and defend them against neighbors, teachers, coaches and policemen.
- Protect them from responsibility, accountability until you can no longer protect them.

⇒ Prepare them for a life of grief.

Quotable

“Kids aren’t dummies. They know who the better players are, who deserves to be the quarterback and the point guard, who should be the starters. In most cases, they can accept their coach’s decisions. They’re thrilled to be on a team...But then the kids have to go home and listen to their parents.”

- from an article by Ron Cook, “Bad Parents Are Pushing Out Good Coaches”

“I estimate that through middle school, high school, college and graduate school I had 18 different coaches and over 65 teachers, I adjusted to different styles and personalities and learned from each of them. However, here is how to get things done in Dell Rapids: If my child’s performance is not what I had planned, someone is going to pay...How long do you plan on doing this for your child? Will trying to fire 18 coaches and 65 teachers get you what you want?”

- from Mick Hoglund, boys’ basketball coach at Dell Rapids, S. D.

“More than ever before in history, kids are flocking to participation in high school athletics. The numbers are the highest ever. The biggest problem is “that everyone wants it the way that they want it” and that is not what athletics is all about. The lifelong lessons that athletics can teach are being lost in modern times.”

- From John Underwood, American Athletic Institute

CONCUSSION INFORMATION

Concussions are a type of brain injury that can range from mild to severe and can disrupt the way the brain normally works. Concussions can occur in any organized or unorganized sport or recreational activity and can result from a fall or from players colliding with each other, the ground, or with obstacles. Concussions occur with or without loss of consciousness but the vast majority occur without loss of consciousness.

In accordance with Section 33-1620, Idaho Code the Idaho High School Activities Association has provided information on its website for coaches, parents, and athletes, concerning the Identification and Management Strategies regarding concussions. The IHSAA encourages all coaches, parents, and athletes to educate themselves about the recognition and treatment of concussions. Please take the time to visit our website at www.idhsaa.org. If you have any questions or need of further information, please contact your school or the IHSAA Office at admin@idhsaa.org.

It is the wish of the IHSAA that you have a safe and enjoyable sport or activity season.

Idaho High School Activities Association

Concussion in Sports

WHAT YOU NEED TO KNOW

A Parent’s Guide to Concussion in Sports

A. What is a concussion?

- A concussion is a brain injury which results in the temporary disruption of normal brain function. A concussion occurs when the brain is violently rocked back and forth or twisted inside the skull as a result of a blow to the head or body. An athlete does not have to lose consciousness (“knocked-out”) to suffer a concussion.

B. Concussion Facts

- It is estimated that over 140,000 high school athletes across the United States suffer a concussion each year. (Data from NFHS Injury Surveillance System)
- Concussions occur most frequently in football, but girl’s lacrosse, girl’s soccer, boy’s lacrosse, wrestling and girl’s basketball follow closely behind. All athletes are at risk.
- A concussion is a traumatic injury to the brain.
- Concussion symptoms may last from a few days to several months.
- Concussions can cause symptoms which interfere with school, work, and social life.
- An athlete should not return to sports while still having symptoms from a concussion as they are risk for prolonging symptoms and further injury.
- A concussion may develop over the next several days or weeks. The symptoms may be subtle and are often difficult to fully recognize.

What are the signs and symptoms of a concussion?

SIGNS OBSERVED BY PARENTS, FRIENDS, TEACHERS OR COACHES	SYMPTOMS REPORTED BY ATHLETE
Appear dazed or stunned Is confused about what to do Forgets plays Is unsure of game, score, or opponent Moves clumsily Answers questions slowly Loses consciousness Shows behavior or personality changes Can’t recall events prior to hit Can’t recall events after hit	Headache Nausea Balance problems or dizziness Double or fuzzy vision Feeling sluggish Feeling foggy or groggy Concentration or memory problems Confusion

ImPACT Testing

Dear Parent/Guardian:

Kellogg High School has implemented a new concussion program titled ImPACT (Immediate Post Concussion Assessment and Cognitive Testing). This program is a computerized exam that is given to student-athletes prior to beginning contact sport practice or competition (baseline). This non-invasive test takes about 15-20 minutes to complete. It tracks information such as memory, reaction time, speed, and concentration. It is not an IQ test. Essentially, the ImPACT test is a preseason physical of the brain. The only personal information necessary for the test is the student's name and date of birth.

If a concussion is suspected, the athlete will be required to re-take the test. Both the baseline and post-injury data will be given to Scott Gibbs, PAC who will interpret the data. This data can also be shared with your family doctor. The data, together with other factors, will enable health care professionals to determine when return-to-play is appropriate and safe for the injured athlete. The data received from the test is health information, so is protected under the HIPPA guidelines.

Please complete and sign below acknowledging consent for the testing and release of information.

Sincerely,

N. Lewis, MSN, RN

DRUG TESTING POLICY GENERAL AUTHORIZATION AND CONSENT FORM

I understand that my performance in Idaho High School Activities Association (IHSAA) sponsored events and other competitive extracurricular events, and the reputation of my school are dependent, in part, on my conduct as an individual. I hereby agree to accept and abide by the standards and regulations set forth by Kellogg School District Board and the sponsors for the activity in which I participate.

I also authorize Kellogg School District to conduct a test for drugs and/or alcohol use. I also authorize the release of information concerning the result of such a test to the Kellogg School District and to the parent/legal guardians of the student.

Pursuant to the Family Education Right of Privacy Act 34, C.F.R Part 99, this form will be deemed a consent for the release of the above information to the parties named above.

PARTICIPATION PERMISSION STATEMENT

I give my permission for my child to participate in organized high school athletics, realizing that such activity involves the potential for injury, which is inherent in all sports. I acknowledge that even with the best of coaching, use of the most advanced protective equipment and strict observation of rules, injuries are still a possibility. On rare occasions, these injuries can be so severe as to result in total disability, paralysis or even death.
